☐ A programming language

☐ A type of software testing

Correct!

☒ A project management framework

☐ A hardware component

## Question 3

3 / 3 pts

What is a User Story in Agile development?

☐ A detailed technical specification of a software feature

Correct!

☒ A high-level description of a requirement from an end-user perspective

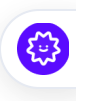

☐ A task assigned to a developer to implement a feature

☐ A document outlining the architecture of a software system

## Question 4

3 / 3 pts

In Scrum, who is responsible for ensuring that the Scrum Team follows the Scrum framework and values?

- ☐ Development Team
- ☐ Product Owner
- ☐ Stakeholders

Correct!

- ☒ Scrum Master

Question 5

3 / 3 pts

What is the primary goal of the Sprint Review?

- ☐ To update the Product Backlog

Correct!

- ☒ To inspect the increment and adapt the Product Backlog as needed
- ☐ To assign tasks for the next sprint
- ☐ To update stakeholders on progress

Question 6

3 / 3 pts

Which artifact in Scrum represents the list of all features, enhancements, and bug fixes for a product?

- ☐ Sprint Backlog
- ☐ Increment

Correct!

- ☒ Product Backlog
- ☐ Burndown Chart

Question 7

3 / 3 pts

What should be the outcome of the Daily Scrum meeting?

- ☐ A detailed plan for the entire Sprint
- ☐ Identification of any impediments or obstacles
- ☐ A report for upper management

Correct!

- ☒ Allocation of tasks for the next 24 hours

## Question 8

3 / 3 pts

Who is responsible for ensuring that the Development Team understands and adheres to Scrum theory, practices, and rules?

☐ Product Owner

Correct!

☒ Scrum Master

☐ Development Team

☐ Project Manager

## Question 9

3 / 3 pts

One of the benefits of daily scrum meetings is that it helps avoid other unnecessary meetings.

Correct!

☒ True

☐ False

## Question 10

3 / 3 pts

What is the purpose of Acceptance Criteria in a User Story?

☐ To specify the technical implementation details

Correct!

☒ To define the steps for testing the functionality

☐ To outline the user's interaction with the system

☐ To prioritize the User Story in the product backlog

## Question 11

0 / 3 pts

What is the role of the Scrum Master during the Daily Scrum meeting?

Correct answer

☐ To assign tasks to team members

You Answered

☒ To facilitate the meeting and ensure that it stays within the time-box

☐ To provide updates on the project status to stakeholders

- ☐ To review and update the Product Backlog

### Question 12

3 / 3 pts

Which of the following is NOT a typical component of a User Story?

- ☐ Acceptance Criteria

Correct!

- ☒ User Interface Design

- ☐ Description

- ☐ Priority

### Question 13

3 / 3 pts

What are the three questions typically asked during the Daily Scrum?

Correct!

- ☒ What are the project requirements? Who is responsible for each task? When will they be completed?
- ☐ What did you do yesterday? What will you do today? Are there any obstacles?
- ☐ What are the project requirements? Who is responsible for each task? When will they be completed?
- ☐ How many hours did you work yesterday? How many hours will you work today? Can you work overtime?

### Question 14

3 / 3 pts

What is the recommended frequency for holding Sprint Planning meetings in Scrum?

- ☐ Once at the beginning of the project

Correct!

- ☒ Once at the beginning of each Sprint

- ☐ Once at the end of each Sprint

- ☐ Once every month

### Question 15

3 / 3 pts

What is the recommended format for writing a User Story?

- ☐ A detailed list of technical requirements

Correct!

- ☒ A paragraph describing the feature from a user's perspective
- ☐ A flowchart illustrating the user interaction with the system
- ☐ A pseudocode implementation of the feature

### Question 16

3 / 3 pts

What is the recommended duration for a Sprint in Scrum?

Correct!

- ☒ 2 weeks
- ☐ 1 month
- ☐ 6 weeks
- ☐ It varies depending on the project

### Question 17

3 / 3 pts

Who is responsible for prioritizing and maintaining the Product Backlog in Scrum?

- ☐ Scrum Master
- ☐ Development Team

Correct!

- ☒ Product Owner
- ☐ Stakeholders

### Question 18

3 / 3 pts

**A User Story for a non-functional requirement might include which of the following acceptance criteria?**

Correct!

- ☒ A. "System response time should not exceed 3 seconds under a load of 1,000 users."
- ☐ B. "User can upload a profile picture."
- ☐ C. "System displays error messages when a field is empty."
- ☐ D. "System provides a report generation feature for admins."

## Question 19

3 / 3 pts

## How are non-functional requirements typically expressed in User Stories?

☐ A. As a separate "So that" clause

Correct!

☒ B. Through acceptance criteria

☐ C. Using "As a [user role]" format

☐ D. By including performance metrics in the story description

## Question 20

3 / 3 pts

## What is the main focus of the Daily Scrum?

☐ A. To discuss project deadlines

Correct!

☒ B. To synchronize team activities and plan the next 24 hours

☐ C. To deliver progress reports to stakeholders

☐ D. To identify risks in the project

## Question 21

3 / 3 pts

## Which of the following is NOT a phase of Requirement Engineering?

☐ A. Requirements elicitation

☐ B. Feasibility Study

Correct!

☒ C. Requirements coding

☐ D. Requirements validation

## Question 22

3 / 3 pts

**How does Scrum ensure continuous improvement?**☐ A. By assigning fixed roles and responsibilities☐ B. By increasing team size after each Sprint

Correct!

☒ C. Through Sprint Retrospectives☐ D. By reducing the scope of the Product Backlog

## Question 23

3 / 3 pts

**What should a team do if a User Story cannot be completed within a single sprint?**☐ A. Move the entire story to the next sprint without changes

Correct!

☒ B. Break the story into smaller, deliverable sub-stories☐ C. Reduce the sprint duration to fit the story☐ D. Prioritize other smaller User Stories instead

## Question 24

3 / 3 pts

**Which of the following is NOT an artifact in Scrum?**☐ A. Product Backlog☐ B. Sprint Backlog☐ C. Burndown Charts

Correct!

☒ D. None of the rest

## Question 25

3 / 3 pts

## Software Requirement Specification describes how the system will work?

☐ True

Correct!

☒ False

Question 26

5 / 5 pts

A stakeholder approaches a Development Team member during a Sprint and requests a new feature that is critical for the product. What is the appropriate action?

☐ A. The Development Team member adds the feature to the Sprint Backlog

☐ B. The stakeholder is directed to the Scrum Master for approval

Correct!

☒ C. The stakeholder is advised to discuss the request with the Product Owner

☐ D. The feature is implemented immediately since it is critical

Question 27

5 / 5 pts

A completed User Story passes all acceptance criteria but fails performance tests (e.g., response time is too slow). What should the Scrum Team do?

☐ A. Close the User Story since it meets the written acceptance criteria

Correct!

☒ B. Create a new User Story to address the performance issue

☐ C. Extend the original User Story to include performance requirements retroactively

☐ D. Ignore the performance issue as it is a non-functional aspect

Question 28

5 / 5 pts

During the Sprint Review, the stakeholders mention that the product increment does not meet their expectations. What should the team do next?

☐ A. Rework the increment immediately in the next Sprint

Correct!

☒ B. Discuss and document the feedback to improve future increments

☐ C. Ignore the feedback as the Sprint is already completed

- ☐ D. Assign blame to the Development Team for the misunderstanding

### Question 29

5 / 5 pts

A User Story says: "As a user, I want to reset my password via email so that I can regain access to my account." During implementation, the team realizes that the system does not yet support email notifications. What should they do?

- ☐ A. Abandon the User Story and choose another from the backlog

Correct!

- ☒ B. Implement email notifications first as a separate User Story
- ☐ C. Rewrite the original User Story to exclude email notifications
- ☐ D. Skip the email notification part and mark the User Story as done

### Question 30

5 / 5 pts

The Development Team reports during the Daily Scrum that they are facing a blocker due to dependency on an external vendor. What should the Scrum Master do?

Correct!

- ☒ A. Resolve the blocker by contacting the vendor or escalating it
- ☐ B. Ask the team to skip the blocked task and move forward
- ☐ C. Extend the Sprint timeline to accommodate the delay
- ☐ D. Ask the Product Owner to remove the blocked task from the Sprint

Quiz score: 97 out of 100
