### CLASS PARTICIPATION 2

-

**Course:** Urban Sustainability (DEV 422 – S1)**Course Instructor:** Farhan Anwar**Date – Tuesday, October 21, 2025****Grading Weight** age – 10%

### Design your sustainable urban space!

**Location:** IDEAL Commons**Time:** 75 min class/ 1 full class session**Resources:** Styrofoam base, chart papers, Lego blocks, play dough, yarn, strings, straws, coloured sheets, sticky notes, markers, scissors, tape, glue and much more!

### **Process for class activity**

- The class is divided into five (5) groups and are asked to work with the resources provided to model out a design of a **sustainable urban space**. It could be **a sustainable neighbourhood, a commercial district, a recreational district, sea side locality etc.**
- Green and sustainability ideas that each group can work with may include a mix of design ideas to promote non-motorised transport (walking/cycling), inclusive spaces, forested spaces, green energy, energy conservation, good public spaces, water conservation, safety and security, informed city etc.
- Each student will add a few attributes to the drawing and **label** the strengths of said attribute as well

- At the end of a given time-frame (**45 minutes**), each group will present what they created and each student will have the chance to explain what they added as well

### **Grading process**

- Students will be graded in groups on the basis of their final output and how well they present it to the rest of the class
